## The fastest, most powerful games console on Earth!

**This is it! You're one-stop introduction to all that's great about the greatest home games machine in existence.**

**M**aybe you've been a fan of Nintendo's consoles for years or perhaps you've just caught a glimpse of the N64 on TV and felt inspired to investigate further.

Fact: the Nintendo 64 is the world's most powerful games console. But what does that mean? Well, inside that curvy black box there's enough computer power to take you to utterly realistic, three-dimensional worlds, where you can lose yourself for hours on end, running, jumping, flying, swimming, shooting... The list is endless, and every month, as new games are released, the N64 offers players yet more trips into new worlds of imagination.

In the past year we've crept around the hideouts of sinister arms dealers in *Goldeneye*, raced through desert canyons at 150mph in *Top Gear Rally*, and fought off the hordes of the undead with a rocket launcher in *Quake*.

But that was the fun just getting started and now we have a whole slew of killer games on the way. *F1 World Grand Prix* is a truly awesome motor-racing game. *F-Zero X* takes you to the race tracks of the future – at around 500mph! *1080°* captures all the skills and speed of snowboarding down alpine peaks. *Turok 2* pits you against ravenous dinosaurs, armed only with an arsenal of enormous guns. *Legend of Zelda: The Ocarina of Time* is the most awesome adventure game of all time. And *International Superstar Soccer 98* is quite simply the most realistic simulation of the beautiful game in existence.

Extravagant claims? Don't just take our word for it. Turn the page and witness these games in their natural splendour. You won't be disappointed!

## N64 features

## What it means...

- **The fastest, most powerful console on Earth!**

Over 1000 times more power than the moon-landing computer - FACT! Apollo 11's CPU - 50,000 operations/sec, N64's CPU - 656,500,000

- **Analogue controller**

The standard Nintendo 64 game controller is unique in that it gives you precise full and precise 360° control over your game.

- **Most advanced 3D graphics**

Z-buffering, trilinear mipmapping interpolation and anti-aliasing. All these built-in features ensure N64's 3D worlds look totally realistic.

- **Multi-player capability**

The only machine with four controller ports built-in, allowing up to four players to compete head-to-head in some N64 games.

- **Silicon speed**

N64 games come on cartridges which means you don't have to wait around for game data to be loaded when you want to play.

## F1 World Grand Prix

**F**or real-life racing thrills you can't beat F1 World Grand Prix.

Developed by Paradigm, renowned for building simulators for the aviation business, this looks and plays about as authentically as any Formula 1 motorsport game you'll ever see. The ultimate joy-ride for any fan of Formula One!

### Racing For real

F1WGP features 17 real-world tracks as well as all the drivers from all of the current teams, so you can participate in the world championships as your favourite driver. You can also practise a circuit against the clock or take on a friend in the split-screen, two-player race.

▲ Faster! Faster, you dogs!

### The drive of your life

N64's unique analogue controller means that the cars handle very realistically. Corner smoothly using the 3D stick, but stray too far from the racing line and you'll spin. Brake too hard and watch your discs glow red and feel the skid as your wheels lock.

▲ Smooth Ferrari handling, here.

▲ Check your skills in the replay.

▲ Fifth on the grid, but raring to go, in F1WGP.

### Race-tuned!

If your car isn't performing to expectations take it into the pits to have it tuned to perfection. Change your tyres to match the changing weather or adjust the aerodynamics by changing the angle of the wings and spoilers. Your pit crew will even fit a new nose cone if you prang your old one on the tyre walls!

▲ Oops! Now might be a good time to visit those pit boys. If you can make it that far.

The most awesome adventure game you'll ever see! Zelda games have been hot favourites with Nintendo fans for years, but great through they were, none of them ever looked or played as good as this N64 title. Guide Link the adventurer through a vast 3D world of caves and castles,

travelling back and forth in time, duelling sinister monsters and solving fiendish puzzles to save his homeland of Hyrule.

### Massive attack

Using the 3D Stick Link can pull off devastating spin attacks, lunges and defensive backflips. He can climb vertical shafts and he even gets to ride across country on a horse!

▲ An almighty shockwave wipes out all foes!

### Movie watch

At times, playing Legend of Zelda is more like taking part in a blockbuster action film. Whenever you solve a puzzle or defeat a particularly major monster the screen goes into movie mode to fill in plot details and introduce new characters. As you can see from the pics, these look very cool indeed.

▲ Check this out. While exploring an ice cave, Link blows on his hands to warm them up!

# F-Zero X

## Track attack

The racing circuits in F-Zero are unlike anything you've ever seen. These crazy-looping constructions float miles above the ground and feature long, sweeping bends, mid-air tunnels, impossible inclines and unbelievable corkscrews! You'll be blasting along these at rocket speeds, so if you're prone to motion sickness it might be a good idea to keep some medication close at hand!

## Ship shapes

In F-Zero you race against 30 plasma-powered hoverships, all of them with different characteristics and driving styles. Before each round you pick which of the 30 is to be your steed, then thrash it round the track till you've mastered it. Then you can try adjusting its handling to match the circuit and your own skill.

▲ 749km/h! Phenomenal!

▲ Leap! Leap to victory!

## Charge!

There are no weapons as such in F-Zero, but you can nobble opponents by barging them off the track. Guaranteed to make you extremely unpopular in the awesome multiplayer modes!

▲ Kabooma! Player 4 cops it!

▲ 3 and 4 were just too slow!

# Turok 2

## New Games

The original Turok set the standard for 3D blasting games on N64, but Turok 2 **REDEFINES** those standards with its awesome graphics and explosive action. Join the dinosaur-hunting hero on another quest to find and destroy a hideous beast known as the Primagen!

### Game Info

By: **Acclaim**  
Players: **1-4**  
Rumble Pak: **Yes**  
Memory Pak: **Yes**

### Keys to success

Turok 2's main quest plays much like the original game. Each level is broken into sections separated by barriers or forcefields. To get through them, Turok has to find keys, sacred talismans and weapons then make his way to the entry point. Easy - or at least it would be if it weren't for all the ravenous monsters that lurk around every corner.

Enhanced polygon modelling techniques have made the beasts in Turok 2 look much more detailed than those in the first game. ▶

### Dino-gore

The original Turok was pretty gory, but number 2 scores even higher on the blood-ometer, with red pixels flying all over the place. The monsters are also much faster and more intelligent than they were before. Now they lurk behind trees and pounce as soon as you're within striking distance. If you're not on your toes you'll be dino-dinner!

▲ He'll feel that in the morning.

▲ Yeah? You want some of this?

### Multiplayer mayhem

Turok 2's most notable new feature is its split-screen multiplayer mode which works in three different ways.

Pick a character to play as and you can either team up with other players to track down dino-prey or play every-man-for-himself and hunt your mates with enormous weapons.

The game also features a tag mode where one player is 'it' and has to blast his opponents to pass on the affliction! Whoever is 'it' the longest loses.

▲ Four players hunting each other - awesome!

# V-Rally 64

▲ Spend some time mastering the controls or this is what happens.

## Race handling

Some racing games simplify the controls for the sake of the gaming public, but not V-Rally. In this game you need to get to grips with the super-sensitive steering to pull off power-slides and skid recovery. If it's not quite how you want it you can always go into the car tune-up mode and tweak the settings to your liking.

▲ Fog's a hazard on some tracks.

▲ An idyllic race setting, eh?

One of the best race games of all time comes to N64. Take one of several race-tuned rallying motors around a huge selection of tortuous tracks all over the world on the hunt for glory and silverware. Don't expect an easy ride, though. Driving conditions are pretty ropery on almost every circuit and you're going to have to put in a lot of practice if you're going to keep your car on the road and out of the ditches!

## Instant replay

The game graphics in V-Rally are pretty spectacular but to get an even more spectacular look at the action, watch the post-race replays.

These let you relive the action from all sorts of dramatic camera viewpoints – behind the car and from the side of the track. This really shows off the amazing graphics capabilities of your Nintendo 64. In fact, if you stand back a bit you could almost be watching a real race on your TV!

# Wipeout 64

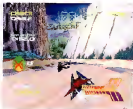

**W**ipeout 64 puts you in the cockpit of an anti-gravity racing ship, blasting through the pack on six futuristic roller-coaster style courses. Master your ship's speed and agility to slide through corners, leap huge gaps and burn up the straights. And if you can't win by speed alone, tool up with weapons and blast your opponents off the track!

## Wipeout mastery

Just because it floats in mid-air doesn't mean your ship isn't subject to the laws of physics. There are four ships to race in and each one handles differently. The fastest are also the most sluggish around the bends and if you want to win you have to learn each track's racing line and master the airbrakes that let you slide through corners.

▲ Left airbrake! Left airbrake!

▲ Hooooo-weeeeeeeeeeeeeeeee!

## Guns 'n' rockets

Watch out for coloured weapon grids on the track. Fly over them to arm yourself with homing missiles, mines and, most spectacular of all, the Quake Disruptor, that tears up the track and sends your opponents flying!

Homing missiles ahoi! Get ready for the lock, then obliterate the guy in front or behind. ►

Race and destroy up to four of your friends! Make them pay! ►

# Mortal Kombat 4

The hottest conversion of the hottest fighting coin-op! The Mortal Kombat series has been thrilling arcade beat-'em-up fans for years, but this 3D extravaganza is the most exciting instalment so far. Join the cast of 15 sinister warriors as they slug it out using unearthly powers and mighty weapons. Conquer a world and leave your opponents in messy chunks on the ground!

## MK tournaments

There's more to MK 4 than just fighting your opponents one at a time. You can take them on in Team mode, picking five of your favourite fighters for you to control one after the other. Or Endurance, which pits you against the full field of warriors with only one character and one energy bar to play with. Finally, there's the tournament, which lets you eight players fight it out until one is crowned MK Champ.

▲ Shurikers? That's not fair.

▲ Reptile's acid spit is v nasty.

## Fists of fury

Eight of the 15 fighters in Mortal Kombat 4 are classic MK characters, but seven of them are brand new. Each has his own special powers and unique combinations of moves, punches, kicks and throws for you to learn. Also, for the first time, each fighter comes armed with a unique weapon. Why bruise your knuckles when you've got a huge mallet in your pocket?

▲ What's Scorpion doing here?

▲ TWO Scorpions? Uh-oh.

## Fatal impact!

Blood and guts has always been part of MK culture, and like the other games MK4 equips the warriors with gory finishing moves! When you've got your opponent on the ropes, a well-practised flick of the controls will punch his head clean off or rip him to bits. Not for the squeamish!

Check out Scorp's flame breath. You can almost smell the charring. ►

# 1080° Snowboarding

## New Games

Ever fancied snowboarding but been put off by the risk of breaking bones and catching a chill simultaneously? Well, here's the perfect solution. 1080° is snowboarding for the safety-conscious. With this game you can race against other boarders, test yourself in time trial or take on the awesome stunt challenge. The graphics are glorious. The control is perfect. The game is essential.

### Downhill all the way

Pick one of five ace 'boarders, then a board and a course and you're set. Now all you have to do is get from the top of the slope to the bottom before your opponent. Slide around moguls, jump chasms, skid over ice runs and through snow caves. Hug the board to keep your speed up but try to control it through the corners or you'll plant your face in a snow drift!

▲ Look at that. Flash git.

▲ Ahh! The tranquility.

### Stunt mode

Stiffys, Mute Grabs even the legenday 1080°. With a bit of skill you can pull off all the moves of the real 'boarding stars on 1080° Snowboarding's half-pipe and ski-jump, and earn whopper scores by stringing together combos.

▲ You can pull stunts in races too!

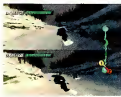

▲ C'mon then! Let's see a 1080°!

### Double boarders

Reckon yourself as top 'boarder? Take on a mate at a downhill thrash in 1080°'s split-screen mode. If you can't beat him by speed alone you can always... well... nudge him over a cliff.

No time to enjoy the scenery when you've got someone right on your butt. ►

# International Superstar Soccer '98

Football fans have a special treat in store with the International Superstar Soccer '98, the most fully updated version of Konami's football video game. 3D, realistic-looking action, and excellent controls are the main attractions, and the game's variety of play is a bonus. The game's controls are simple, and the game's graphics are excellent. The game's controls are simple, and the game's graphics are excellent. ## A team effort

How about a friendly kickabout with your mates? Up to four players can take part in competition or friendly matches in ISS98, and you don't have to play every-man-for-himself. A co-operative effort with two players controlling each team is loads more fun.

▲ The post-goal celebrations are something to see.

## Take the weather with you

It doesn't matter what conditions you prefer for a kickabout, they've all been included in ISS98, and they all affect how the game plays. Players tire more easily in sunshine, and they're slightly harder to control on a rain-soaked pitch. And only the truly skilled will want to play in the middle of a snowstorm!

▲ It's hot. Too flippin' hot.

▲ Play all over the world!

## Up for the cup

ISS98 has six game modes. Not only can you polish up your skills with the training option but you can also take part in a world league tournament, an international cup competition or a one-off friendly.

▲ Cool action replays, eh?

▲ Replay WC98 games!

# Mission: Impossible

Play top agent Ethan Hunt in this 3D spy adventure based on the blockbuster movie. Your mission, should you choose to accept it, is to do stuff like springing captured agents from foreign embassies, destroy submarines carrying nuclear missiles and finding the mole that threatens to blow the cover of the whole organisation. A great mix of game styles and cool visuals make this a game you won't want to miss.

## Sneakin' around

Most missions have you playing as Ethan, infiltrating enemy territory by sneaking around the 3D landscape, getting around obstacles and dodging guards and searchlights. Remember, the key to success isn't always firepower. Stealth and speed are more important.

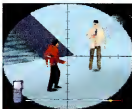

▲ Ethan infiltrates embassies...

▲ ...and gas-filled warehouses.

## Sniper missions

There are times when Ethan is on his own and all you can do is help protect him. On these occasions you control two of Ethan's team who are covering him with rifles from sniper positions. Zoom your scope in to pick out any suspicious characters then drill 'em before they know what's going on!

▲ Is he reaching for a gun?

▲ Quick! Blast the assassin!

## Face changer

Every secret agent needs his gadgets, and Mission: Impossible is full of 'em. Best of all, though, is the face changer. Knock out a guard and this gizmo can make a foam rubber copy of his face. The perfect disguise!

One minute he's a secret agent. The next, a colonel in an enemy army. The best disguise kit ever! ►

# Bio FREAKS

 Memory Pak: **Yes**

Anyone who thought *Mortal Kombat 4* was a bit vicious will have to hide behind the sofa while playing *Bio FREAKS*. This is the goriest 3D horror fighting game yet, with a cast of ten of the most hideous warriors ever. These guys come armed with flame throwers and all kinds of other weapons, and they drool, vomit and gush blood as their opponents hack off limbs and slice off heads. Definitely not for the nervous.

## Fists vs bullets

There are 10 fighters in *Bio FREAKS*, as well as two hidden characters. Each of them comes equipped with more than 20 unique attacks, plus a weapon that fires projectiles. So you can choose to go in for some traditional hand-to-hand action, or dodge to the other side of the arena and try to gun your opponent down.

▲ Couple of heavily-armed fellows here. Mayhem is afoot.

▲ You wouldn't want to meet this bloke in a dark alley.

▲ "GALF BIGHI Huh-huh, that put the wind up yers."

▲ Mal'haug hears the good old boot-up-the-burn.

## Underwater action

The fight arenas in *Bio FREAKS* are unlike anything you've seen before. You can fly your fighter up to a high ledge or throw your opponent into a lava pit, only for him to re-emerge in flames and ready to fight on. Most amazing of all is an underwater arena, in which you have to avoid drowning and being eaten by piranha fish as well as having to worry about your opponent!

▲ Nowhere to hide in here.

▲ Fly up the screen to escape!

▲ He might be a winner, but will he ever find a place where he looks like this? We think not.

# Body Harvest

New Games

Insectoid aliens have descended on Earth for a long lunch, but Adam Drake has made it to the safety of an orbiting space station. From here he can use a prototype time machine to go back through time to five different periods when the alien diners arrived, and, with any luck, send them packing. Body Harvest combines blasting action, flight simulation and puzzle-solving with awesome 3D graphics to create one of the most innovative games you'll see anywhere!

## Time to kill

Drake's time quest takes him from Greece in 1916 to the alien homeworld in 2046, and as you'd expect, he has to clear out the aliens using the technology of the period. Drive vintage cars in olden days, or later on, take the controls of a helicopter or torpedo bomber and bomb those alien bugs back to Hell itself!

▲ Fight spiders in a chopper.

▲ And giant mossies in a cable car.

## Use your head

It's not all guns and bombs in Body Harvest. To make progress you need to use your brain as well as your trigger finger. Explore each city, solving puzzles, finding hidden areas and completing tasks like using a fire engine to stop a blaze or leaping an impassible gorge on a motorcycle. Who'd have thought saving the world would be so much trouble?

▲ Climbing these peaks ain't easy.

▲ How can this buggy help?

▲ Escape is your only hope in this transport 'copter.

▲ A 1940s torpedo bomber! Now they'll pay the price!

# Rogue Squadron

It's every Star Wars fan's dream! Rogue Squadron puts you in the flight suit of rebel hero Luke Skywalker, defending the Alliance against the forces of the Galactic Empire in all kinds of starfighters.

## Man your ships

Rogue Squadron lets you fly all the rebel fighters in the movies - X-Wings, Y-Wings, A-Wings and snowspeeders. You even get the V-Wing airspeeders from the latest comic book series!

It's taken the genius of British game developers, Rare, to produce a 3D platform game that rivals even the mighty Mario 64. Prepare to make friends with the bear called Banjo and his birdy buddy, Kazooie!

### Rare genius

What's great about Banjo-Kazooie isn't just the incredible quality of the game's graphics that you can see in these pictures. The ingenious levels that range from desert islands to mysterious jungles to the snowy Arctic, the characters and the challenges are all utterly ingenious. You can't fail to be impressed by this game.

▲ You meet all kinds of weird characters in Banjo-Kazooie.

▲ Collect musical notes, honeycomb pieces and jigsaws to progress through the worlds.

### A friend in need...

One of the unique aspects of Banjo-Kazooie is that you need to think 'teamwork' all the way. Getting out of scrapes often demands that Banjo the bear uses his own special skills, but he won't get anywhere without the airborne power of Kazooie, who can airlift him to otherwise unreachable heights!

▲ Kazooie the bird can carry Banjo to unreachable areas...

**S**o-called 'Corridor' shoot-'em-ups like Doom and Quake made a big impression on game players, but Goldeneye 007 takes 3D fighting to the next level! The game follows the action in the ace Bond movie with you in the licensed-to-kill role of 007!

## Tanks a lot!

Being the world's greatest secret agent means you see all kinds of action. One minute you might be bungee-jumping off the side of a dam, and the next you're driving a tank through Moscow!

▲ Even the Space Shuttle makes an appearance.

## Pay attention, 007

Not even Q could foresee the goodies Bond gets in Goldeneye. There are all kinds of weapons, from throwing knives to laser pistols, and even Bond movie favourites like an electro-magnetic laser watch!

▲ The sniper rifle even has a zoom-in sight!

## Mission: quite difficult

One of the differences between Goldeneye and Quake is that each mission in Goldeneye is more of an adventure, with set objectives. The other difference is that Goldeneye demands stealth tactics. Charge through a door with guns blazing and you attract dozens of guards, but if you sneak through and deliver a swift and silent Karate chop you'll meet less resistance.

▲ Two pistols! Haha! Now nothing will stand in your way! Bwa-ha-haa!

## 001, 002, 003, 004...

Goldeneye is great fun for up to four players! The multiplayer mode lets you fight it out with your friends on a screen split into quarters. Loads of game variations let you tailor the challenge to your skills. Very cool!

▲ Lasers, eh? Time for a power-up.

## Robot monsters!

Even when you're bristling with guns Forsaken presents a fearsome challenge - this is one of the toughest N64 games out there! If you survive each level's maze of tunnels you're sure to be toasted by the game's mighty robot bosses. Be sure to save your big guns for these guys, and get ready to dodge and weave like crazy if you want to see the next level!

▲ Looks almost too good to blast!

▲ Torch tanks before they get you!

## Into battle!

Forsaken has several game modes beside the standard quest. You can take on up to three other computer-controlled bounty hunters in the battle mode or three other human players in the cool split-screen deathmatch!

Try lurking in weapon-rich areas. Blast your foes as soon as they turn up. ►

# Yoshi's Story

**M**ario's dinosaur pal, Yoshi, stars in this traditional-style platform game, which has loads of neat gameplay touches and graphical effects that bring it bang up to date!

## Game Info

Memory Pak: **No**

## Fruity smells

The Yoshis keep their strength up by chomping the fruit they find on their journey. Each Yoshi has their own favourites that give them extra strength, but best of all is the melon. There are 30 hidden in each level and sniffing them all out is a real challenge!

▲ Weirdo monsters pop up all over the place in Yoshi's Story!

## Once upon a time...

Baby Bowser has stolen the Happiness Tree from Yoshi's Island and six young Yoshis are out to retrieve it. Help them through platform-packed landscapes, dingy caves, cloudy domains and crazy jungle lands. Each level is a page in Yoshi's Story, and your skill determines the path the story takes. Explore every route to master the game!

▲ A jungle treehouse is just one of the settings!

**F**rom the team who have brought you 1080° Snowboarding, this unusual race game is a treat for the eyes as well as the adrenal glands. Jetski around nine challenging courses at three different skill levels. Weave around the slalom buoys to build up your speed and leave the rest of the field in your wake!

As in 1080° Snowboarding, Wave Race has a stunt mode that lets you show off your jetski tricks. Spins, jumps, handstands, they're all here, but be sure to try the Practice Mode before you get too adventurous! Become a master and you can run through a whole routine to rack up massive bonus scores.

▲ Amazing graphics, eh?

▲ Slalom between the buoys!

## Stunt skiing

▲ A quick flick of the 3D Stick let you pull off all kinds of stunts. Don't try this at home!

## Deathmatch!

The biggest thrills in Quake have always come in head-to-head Deathmatches between human players. N64 Quake lets two people fight it out in seven multi-storey arenas, empty of monsters but bristling with weapons and packed with teleporters! Look out – behind you!

▲ Eugh! Zombies pelt you with rotting flesh!

# Quake

Once upon a time you needed around £1,000's-worth of PC hardware to play this thrillsome shoot-'em-up, but now less than £100 buys you the world's most powerful console, which does it even better! Yep, one of the greatest 3D blasts of all time is now on N64!

## Lurking horrors

Explore the 3D environment of 25 danger-packed levels set in dark castles and high-tech fortresses, but beware of the creatures that lurk around every corner! Find some mighty weapons and blast them to gorey bits! Not a game for young 'uns!

## Fighting skills

Learning button combos to pull off fight moves is one of the major hassles in beat-'em-ups, but Fighters Destiny makes it easier for you. Move, duck and jump with the D-pad, use the A button to kick, B to punch and the shoulder buttons to block and dodge.

▲ You get some spectacular graphical effects when you connect with one of your fighter's special moves.

# Fighters Destiny

Step into a 3D arena and get ready to rumble. Fighters Destiny is a beat-'em-up par excellence, starring 10 different fighters, all with their own style and techniques. Show your mastery and you may earn a glimpse of five super-powerful (or super-bizzare) secret warriors!

## I am the master!

There are five games in Fighters Destiny including a two player fight and a training mode. The best, though, is the Master Challenge in which you can earn extra moves for your own warrior and save these to a memory pak.

# Mario Kart 64

**S**uper Mario Kart on the Super NES was an all-time favourite, and there's even more fun to be had with this N64 update!

## Road rage!

A split-screen multiplayer mode lets up to four players race against each other. Top fun is Battle Mode, in which you have to search 3D mazes for your opponents then blast them before they blast you!

▲ Find your mates then shell 'em!

## Racing class

Mario Kart 64 is a sort of comedy racing game starring top plumber, Mario, and seven of his friends and foes from other Nintendo games. Drive against them in three different speed classes, on 16 weird and wonderful courses, all packed with hazards and collectable power-ups!

▲ Faster Mario! You'll never win at this rate!

# Diddy Kong Racing

**T**ake control of junior ape, Diddy Kong or one of his seven cuddly mates in this action-packed (but seriously cute) racing game!

## There they go!

In Diddy Kong Racing you race on loads of courses set on land, sea and even in the air. So put your foot down, powerslide around the corners, and grab the power-ups that turbo-charge your vehicle or blast your opponents off the course!

▲ Start exploring from here.

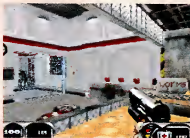

## Racing quest

There's an adventure element to DKR. Master all the tracks on Diddy's island home and you can gain access to a fourth area, where the racing action is super-tough! There are loads more secrets to find, and even some mystery characters!

## Invasion: Earth

Alien beings have landed on Earth and are kidnapping our women! Fortunately, Duke is packing rocket launchers, lasers and his Mighty Foot to splat those ETs! Definitely not for the faint-hearted.

## Dash on the ground!

Dash's adventure takes him to hidden bases all over the galaxy, all of them full of bad guys and precarious platformy-bits. Dodge and blast to survive, but be careful not to tumble into oblivion!

▲ Use your blaster pistol to clear the way of obstacles, as well as enemy droids and bounty hunters!

## Put up four Dukes

Duke Nukem 64 recreates the multiplayer thrills of the PC original with split-screen head-to-head battles and co-operative modes for up to four players. Playing with bazookas is never this much fun in real life!

# Shadows of the Empire

**F**ans of Star Wars will enjoy this incredible 3D action game starring heroic mercenary, Dash Rendar, as well as Luke Skywalker, Han Solo, and lots of other members of the Star Wars gang!

## Dino-wars

*Turok* starts off armed only with a hunting knife and a bow, but after a few levels he's packing power weapons which produce awesome explosion effects! Topping the lot is the Chronosceptre, which wipes out everything in a blue flash!

## Finding the lost world

*Turok* has to explore nine levels of lifelike 3D action. Navigate prehistoric jungles, lost cities and even a treetop village while seeing off attacks from time-travelling gunmen, vicious natives and a variety of big-toothed dinosaurs!

▲ Warm up your trigger finger in *Turok*!

## Armed & dangerous?

The basic idea in Doom is to make your way around 3D levels in search of coloured keys that help you get through level exits. And boy do you wanna escape! The Doom world is just full of nasties eager to eat you!

▲ Eat high-explosive rocket, foul Mancubus!

## Is that a gun in your pocket?

To kill the huge quantity of monsters that roam around Doom 64 world you're gonna need some serious hardware. Shotguns, a chaingun, rocket launchers and an excellent laser weapon toast all who dare to cross your path.

## Silky skills

There's a lot to master in World Cup 98. Learn to play strategically, setting up formations before the game, and activating special tactics like offside traps during the action. There are also special moves such as nutmegs, spins and flicks you can learn to flummox the opposition. You can even play dirty and take a dive in the penalty box!

▲ Impress your mates on the action replay.

# World Cup '98

Okay, we didn't win, but with World Cup 98 you can replay those crucial matches and send our boys all the way to the final. With all the teams, all the grounds, all the skills and all the thrills, this is the best World Cup experience you can have – at least until 2002.

### Ring of realism

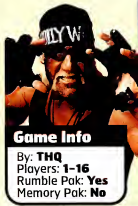

Unlike some other wrestling games, WCW vs NWO uses 3D graphics to give the fighters and their environment a solid look and feel. This really adds a lot to the game. When Hollywood Hogan slams Ric Flair into the turnbuckle you can almost feel it – especially if you happen to have a Rumble Pak plugged in at the time!

▲ A body slam off the turnbuckle! Yeeouch!

## WCW vs NWO

One of the most original 3D console fighting games, WCW vs NWO lets you participate in the crazy world of the American pro wrestling leagues, pitting the WCW all-stars against their badass rivals in the NWO.

### All the right moves

WCW vs NWO features more than 40 famous-name wrestlers and all of them can pull off a wide variety of slams, grabs, throws and holds, as well as their own signature moves that they use in their real-life ring-bound battles.

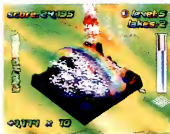

## Wetrix

You've never played a puzzle game like this! Wetrix gives you a floating square of land that's being drenched with rain. You have to arrange the falling land strips to build up dams and contain the water that's dripping over the sides. Let too much go over and you're in for a soaking!

### Scoring a duck

The way to score big points in Wetrix is to build up separate lakes. The more you have, the bigger your bonus grows. Try building high lakes and a duck arrives for a swim, bumping up your points even further!

▲ A rainbow multiplies your score!

### Hard rain

Rain's not all that falls from the sky. To spice things up a bit bombs drop in to blow holes in your landscape, but you can save yourself by dropping an ice block to freeze the water or a flaming meteorite that makes it evaporate!

▲ Phew! An evaporation asteroid saves the day!

## Start off slow

Being more of a driving simulation, with realistic handling and weather effects, Top Gear Rally is quite tricky to get the hang of. Learn to handle slower cars on simple seaside courses, but after winning a few seasons you'll be bombing around winding mountain roads at 150!

▲ If you think this looks tricky now, you should try racing in fog!

## Going off-road

As you're tearing up the tarmac, watch out for openings by the roadside. Sometimes these lead to shortcuts that can cut seconds off your lap time, but only if you've the skill to drive on the off-road surface without turning your car upside down!

## Blockheads

Tetris masters know that the more blocks you can remove in one go the better. So play strategically and arrange your blocks so that you just need to drop in one last piece to set off a massive chain reaction!

▲ Twist that sphere and plant those blocks. Make three mistakes and you're dead!

# Tetrisphere

Everyone's played Tetris, but this 3D version will test puzzle masters. Link rectangular pieces on the surface of a sphere to strip away layers until you drill through to the core. Sounds easy, but can you do it against the clock?

## Spheres of destiny

There are five game styles in Tetrisphere. Play against a computer or human opponent or against the clock. Even tougher are Hide and Seek, in which you've got to uncover the core, and the 100 Stage Puzzle, which only lets you have 100 moves.

# Official Add-Ons

With so many Nintendo titles making use of the N64's multi-player gaming facilities you're gonna need some extras to beat your mates and show off your Nintendo 64's power. This set of official Nintendo plug-in peripherals will add even more depth to your gaming and spread the fun even further!

## N64 Gaming Essentials

### N64 Controllers

One of the best things about the N64 is that there are so many ace multiplayer games that let you challenge your mates. Ever tried Goldeneye's multiplayer battle mode with four people hunting each other? Superb! So why not pick up an extra controller or three, or better still, get your mates to buy their own. Official Nintendo controllers are available in a variety of colours so superstitious players can pick their lucky hue.

### Controller Pak

Some games save high scores, league status or mission progress in a Controller Pak which plugs into the bottom of your controller. If you're going to buy an add-on for your N64, we'd recommend you put the Nintendo Controller Pak at the top of your shopping list.

### Rumble Pak

This battery-powered baby adds a new dimension to your N64 gaming. Plug it into the bottom of a controller and you'll FEEL the action in all sorts of official Rumble Pak-compatible games. In Goldeneye you'll get the recoil from your guns, and in Lylat Wars the pad shakes when your Arwing takes a hit, and when huge alien spacecraft thunder overhead. Quite simply an amazing extra that's well worth having.

# N64: The Future

**The fun goes on! There are more than 60 N64 titles in your game store right now, and with over 50 more coming by Christmas, you'll be N64 gaming right into the next century!**
